

# CMT ASSIGNMENT

## Create an HDR Photo

<b>Objective:</b>	Merge several exposures to create a high dynamic range image
<b>Due Date:</b>	March 13, 2015
<b>Procedure:</b>	<p>Use the program Luminance HDR</p> <p>You will be creating an HDR image with a “hyper-realistic” effect. It should resemble something between a photograph and a painting. Increasing the saturation and detail (no more than 10) will be helpful.</p> <ul style="list-style-type: none"><li>• Load 3 different exposures of the the same image</li><li>• Enter the exposure values if necessary</li><li>• Choose an appropriate “operator” (Suggestion: Mantuik '06)</li><li>• Adjust the sliders to desired values</li><li>• Create preview with a low resolution</li><li>• When you are satisfied with the result, save your image at a higher resolution</li></ul>
<b>Filename:</b>	<p>CMT HDR 1 – <i>last name, first name</i></p> <p>copy and paste, replacing <i>last name, first name</i> with your name</p> <p>Shortcut hint – after selecting a file, the F2 key allows you to rename</p>
<b>Assessment</b>	<p>10 pts</p> <p>Partial marks awarded if results do not closely resemble the examples.</p>
